SAFETURE®

Safeture® – the best choice to create a safer future

Protect your most valuable assets – your employees!

Many companies still spend significantly more on the safety of their buildings and equipment than on the most valuable intellectual property – their employees.

When the unexpected happens – terrorist attacks, natural disasters or extensive political protests – it is often very difficult to find out what has really happened and close to impossible to locate employees straight away. Where are they, and more importantly, are they safe?

Safeture® helps your company and your employees to quickly take control of the situation and make informed decisions.

The Safeture platform is the best choice for companies that want to protect their employees from risks and act professionally when something happens.

Adaptable and fully prepared for future challenges

Safeture Enterprise platform gives corporations the ability to effectively automate safety and security, while seamlessly integrating the software to become a natural part of their internal processes.

The platform is a complete and cloud-based service managing risk, safety and crises processes involving employees.

Safeture Enterprise platform is easy to adapt to each company's unique needs and fully prepared for future challenges. A platform that is becoming increasingly important when your business grows and has to respond to harder demands from authorities.

Through world-leading technology and innovative thinking, Safeture Enterprise platform enables you to protect what matters most – your employees.

> " Large corporations face a tremendous task in ensuring their workers' safety and security, and the processes today are often ineffective and cumbersome. "

Safeture Enterprise modules

Safeture® TRM

Safeture TRM keeps travelers safe, wherever and whenever traveling and provides real-time status on warnings, alerts, security information and travel plans.

- Our team of analysts assesses all important events around the clock and compiles reliable information about what has happened.

- Through world-leading technology, Safeture identifies which people are in the vicinity of a serious event and provides relevant information via the phone about what has happened and advice on how to act.

- Safeture is well established and already helps more than 1 000 organizations and companies.

- With travel booking data, business travelers are quickly updated about any modified travel plans or delays directly on their phones.

- Studies show that staff feel safer when traveling with Safeture.

How does Safeture® TRM work?

Incident

Traveler

SOS

Safeture software picks up incident.

People in the affected area receives information in App or via SMS.

Traveler activates SOS functionality. Managament/Assistance provider initiates 2-way communication and takes action.

Server

Analysis 24/7 team receives information.

Management

Analysis 24/7 team

Analysis team push out information.

Safeture platform notifies Management/ Assistance provider.

Distributions channel

Personal mobile app

When something big happens, it's always hard to find objective information about the situation.

Through world-leading technology, Safeture ensures that people in the vicinity of a serious event are quickly informed. Our analysts assess the situation and give advice on how to act – directly via the mobile phone.

Company risk management

With the help of a web-based tool, corporate security officers immediately have access to visual overviews and effective communication.

The risk management tool presents all warnings for travelers in high-risk areas or in areas where a serious event has recently occurred.
