

NxEmbedded

The Power Of Nx At The Edge

- A fully functional Nx Server, embedded in the camera.
- Serverless architecture, everything on camera.
- MicroSD storage of up to 1TB*.
- Range of integrated onboard analytic plugins.
 - Ai Analytics
 - Face detection, with profile matching
 - ANPR/MMCR
- All the advantages of Nx.
 - One-click system-wide updates
 - Server-hive architecture
 - Flexible Grid User Interface
 - Encrypted Storage
 - Advanced meta-search features
 - Online Global Support

SUPPORTS HIGH CAPACITY ENDURANCE microSD

WD- SC QD101* Ultra Endurance

32GB to 1TB

Operates in temperature from -25°C to 85°C

10+ years operating life**

3 Years Limited Warranty

*Other models are available
**16 to 512 TBW

SUPPORTED VCA APPLICATIONS

Ai Analytics

Face Recognition

ANPR

Forensics

RetailTrend

* Recommended WD-QD101 range of microSD cards, currently available from 32GB to 1TB. Other microSD models are available.

VCA PLUGIN OPTIONS

ADVANCED AI TRACKING FEATURES

The VCA edge plugin allows AI analytics and events to be produced on the camera, removing the need for server hardware using three deep learning engines to provide excellent results.

FACE RECOGNITION

Turning the camera into a FACE detector, this plugin can create an event when a face is detected and forward the metadata as part of an integrated solution or as a standalone system at the edge, no server.

ANPR & VEHICLE RECOGNITION

Available across the IPAi range, the plugin can turn your camera into a licence plate detector with the added optional feature of make, model and colour recognition. Used as part of an integrated solution or standalone ANPR system, no server.
